

Our fully baffled self-bunded tanks for on-site storage and transportation of diesel range from 1,000L to 10,000L. They have been designed and approved to fulfill multiple applications in the Heavy Industry, including Construction, Agriculture and Mining. They are also designed for visibility across all external surfaces of the tank. They are also designed and approved for site storage and transport of diesel, petrol, lubricants and waste oil.

### FUEL STORAGE COMPATIBILITY

Diesel

Unleaded

Lubricants

Kerosene

### FEATURES

- Mild steel internal tank and wetted parts - heavy duty mild steel external tank.
- Stackable - three-high when empty / two-high when full.
- AS1940 approved for the handling and storage of flammable and combustible liquids.
- AS1692 approved for steel tanks containing flammable and combustible liquids.
- Self-bunded to facilitate leaks: 100% Primary Tank + 10% interstitial space = 110% bunded tank.
- Forklift pockets, and stress and strength tested lifting tie points at each corner.
- Fluid level dipsticks for tank and interstitial space.
- Compliant emergency relief vents on the main tank and interstitial space.
- Overfill protection and electronic overfill alarm.
- Fill point with fire safe ball valve, non-return valve and camlock with dust cap connection.
